

6516206886.txt

Dear Congress Member:

Please stop HR 4026! As a responsible voter and tax paying citizen, I believe that our elected legislators are trying to undermine our consumer rights.

The government is essentially violating our 1st Amendment rights by restricting the private sector from providing information to the public. Satellite radio traffic updates is only the beginning. This would set a dangerous precedent that would allow future legislators to compromise our freedom to information even further. Satellite radio is a paid subscription service and the government has no place in regulating its content.

Sincerely,
Nehal
